

in8Cite

CITED REPORT WRITER BUILT BY INVESTIGATORS FOR INVESTIGATORS

ELYON International is proud to offer in8Cite - an innovative cited report writing solution. in8Cite delivers uniform, **AI-enhanced** citation-based report writing capabilities that enhance **efficiency** and **knowledge transfer**.

in8Cite helps report writers **organize, report** and **share** findings, recommendations and supporting documentation.

ORGANIZE

- Import and organize supporting documents and URLs related to the report.
- Enterprise-grade, intelligent PDF and document processing converts and optimizes document quality of 100+ file formats.
- AI-enhanced tools to analyze and understand supporting document contents.
- Perform Optical Character Recognition (OCR) of documents to enable text searching.
- Add and edit user-selected attributes and identifiers to clearly define and define supporting documents.
- Document viewer displays 100+ document formats including PDF, common image file, CAD, and Office formats.

REPORT

- Robust word processing engine for report writing, editing, and formatting in a Microsoft Word-like environment.
- Create hyperlinked citations to supporting documents, including pinpoint cites to specific pages of a document.
- Write reports and view supporting documents in the same application.
- Sort, filter, search and annotate supporting documents.
- Highlight supporting document text and directly insert the text and a citation into the report.
- AI-enhanced suggestions improve writing clarity.

SHARE

- Create a Linked PDF Report – a single PDF file containing the report, hyperlinked citations, and supporting documents.
- Hyper-compression of large reports to provide top quality linked PDF documents at the smallest possible size.
- Unique Identifier added to each page of supporting documents.
- Access reports in an offline status.
- Linked PDF Reports sharable as a single file via any existing file transfer protocol, including email, on-premises servers, or cloud-based repositories.
